

International Society for Serotonin Research

Formerly Serotonin Club

Welcome

Dear Colleagues: Happy New Year!!!

I welcome you as the latest President of ISSR, having taken over earlier in 2022 when Anne Andrews' tenure of fine stewardship came to an end. There are other recent changes within the executive committee to announce with Kelly Berg's long and distinguished reign as Secretary/Treasurer now passing on jointly to Noelle Anastasio (Secretary) and Lynette Daws (Treasurer), and John Neumaier joining as Vice-President North-America. Other important changes to the ISSR Council are imminent.

This is our first ISSR Newsletter in quite a while. Since our last one the world has been turned upside down by the viral pandemic. As we all know only too well, nations were in turmoil, economies collapsed, travel was suspended, and many people and their families were caught up in personal tragedies. ISSR and the serotonin community was no less affected with our 2020 meeting cancelled at the last minute (twice!), our research and productivity slowed, and our careers and future plans were put on hold. But recovery has been remarkably fast, and we now enter an exciting period of new discoveries in serotonin research, innovative technologies, and the long sought-after opportunities for meetings, scientific exchanges and sharing of ideas that we have missed so much.

Continued on Page 2

Number 98,
2023-1

IN THIS ISSUE:

- Welcome
- ISSR 2023 Symposia
- Meeting program
- Travel Awards
- Awardees
- SfN Mixer 2022
- Richard Green
- Ewan J. Mylecharane
- Mitsuhiro Yoshioka
- Announcements
- Membership
- And More...

Our recent ISSR webinar was a nice example of our recovery with fantastic presentations of cutting-edge serotonin research by Bryan Roth, Susanne Dymecki, Gitte Knudsen, Harriet Schellekens and Yulong Lin. A real global event reaching out to many hundreds of serotonin researchers. Sometimes online platforms are not-bad things!

And now we have looming large the 20th ISSR Meeting to be held in Cancun (23-27 April 2023), themed Serotonin on the Mexican Caribbean! The local organising committee together with the previous and present Executive Committees have put together a high-quality scientific programme comprising 13 symposia that spans basic and clinical serotonin research and brings with it a strong translational theme. A feature of the meeting will be plenary lectures by the world-leading serotonin researchers Rene Hen, Kjell Fuxe and Lynette Daws plus presentations by a large cohort of early career researchers. The meeting location at the stunning Marriott Cancun Resort hotel is not to be missed.

On a very sad note, the last year has seen the passing away of Ewan Mylecharane, Mitsuhiro Yoshioka and Marc Caron. Over their lifetimes all three made major discoveries in the serotonin field and were loyal supporters of the ISSR (formerly Serotonin Club). They will be dearly missed by us all, but neither they nor their contributions will be forgotten.

I just want to end with a huge thanks to colleagues who have been so instrumental in keeping the ISSR alive and kicking during the recent difficult times, and right up to the present day when we are on the verge of the exciting meeting in Cancun. At the top of the list are Anne Andrews and Kelly Berg (some of their decisions and negotiations have been eye-wateringly difficult!) but add to it all members of the current Executive Committee (thanks Noelle for the tireless energy!) and Council, the Cancun Organising Committee as well as the symposium organisers and speakers who have stuck with the scientific programme for Cancun. And finally, thanks also to Mariano Soiza Reilly and Sebastian Fernandez without whom we would not have this Newsletter and my words, nor the ISSR Website with all the information you need on how to register for Serotonin on the Mexican Caribbean!

Trevor Sharp
ISSR President

ISSR 2023 Symposia

"Serotonin on the Mexican Caribbean"

Marriott Cancún Resort and Spa, Cancún, Mexico

April 23-27, 2023

The 20th International Society for Serotonin Research meeting will be held April 23-27, 2023 at the Marriott Cancún Resort and Spa in Cancún, Mexico. The meeting will include 13 symposia: 7 single session plenary symposia and 6 symposia scheduled in parallel sessions. One Young Investigator Trainee (e.g., graduate student or postdoctoral fellow) will be added as a fourth speaker to each symposium. In addition, we will have three oral sessions comprised of selections from submitted abstracts, and an evening poster session. We are very pleased to announce that the honorary Irvine Page plenary lecture will be given by **Professor Lynette C. Daws** (University of Texas Health Science Center- San Antonio), the honorary Maurice Rapport plenary lecture will be given by **Professor Kjell Fuxe** (Karolinska Institutet), and the honorary Paul Vanhoutte Distinguished lecture will be given by **Professor René Hen** (Columbia University).

Serotonin on the Mexican Caribbean

Marriott Cancún Resort and Spa, Cancún, Mexico
April 23-27, 2023

Translating Serotonin

- Preclinical and clinical developments in psychedelic therapy for psychiatric disorders
- SERT and beyond in treatment of depression
- Mining 5-HT for precision medicine for substance use disorders
- Towards a better understanding of how 5-HT modulates impulsivity
- The therapeutic potential of novel 5-HT_{2C} receptor compounds

Connecting Serotonin

- Advances in molecular neuroimaging of the 5-HT system
- Development and plasticity of serotonergic circuitry
- Physiology & behavioral functions of dorsal raphe 5-HT neurons
- Lipid dynamics and 5-HT signaling in the brain: From molecular interactions to behavior

Building Serotonin

- Serotonylation: new vistas of receptor-independent 5-HT signaling
- Physiological relevance of 5-HT receptor functional crosstalk
- Are cerebral functions of 5-HT₄ receptors evolutionarily conserved?
- The fruit fly: An important model for the study of 5-HT neurobiology

Meeting Registration (opens December 1, 2022)

Early Bird: January 16, 2023 (fees increase after Jan 16, 2023)

Regular: March 1, 2023 (fees increase after March 1, 2023)

Late: April 1, 2023

Due to our contract with the meeting venue, fees will not be refunded after March 1, 2023

| Registration Category | <u>Early Bird</u> Dec 1-Jan 16 | <u>Regular</u> Jan 17-March 1 | <u>Late</u> March 2-April 1 |
|---|-----------------------------------|----------------------------------|--------------------------------|
| Plenary or Parallel Symposium Participant Chair/Speaker ISSR Member | \$375 | \$425 | \$475 |
| Plenary or Parallel Symposium Participant Chair/Speaker Nonmember | \$510 | \$575 | \$625 |
| Student ISSR Member | \$350 | \$400 | \$450 |
| Student Nonmember | \$450 | \$500 | \$550 |
| Retired ISSR Member | \$325 | \$375 | \$425 |
| ISSR Member (includes postdoctoral fellows) | \$510 | \$575 | \$625 |
| Nonmember Delegate (includes postdoctoral fellows) | \$775 | \$825 | \$875 |
| Guest (Attend Social)** | \$200 | \$225 | \$250 |

*Fees will not be reimbursed after 1 Mar 2023

**Guests attend: opening/closing events, poster session, coffee breaks

Register [HERE](https://www.serotoninclub.org/2023registration):

<https://www.serotoninclub.org/2023registration>

Abstract Submission (opens December 1, 2022)

For **short oral or poster** presentations: **February 8, 2023**

(Notification of acceptance by Feb 22, 2023)

abstracts accepted for short talks will also be programmed as a poster presentation

Details for Meeting registration and abstract submission will be available at

<https://www.serotoninclub.org/issr>

We look forward to seeing you in Cancún!

"Serotonin on the Mexican Caribbean"

Marriott Cancún Resort and Spa, Cancún, Mexico

April 23-27, 2023

Marriott Cancún Resort

The Marriott Resort in Cancun is a complex that includes the JW Marriott along with a number of restaurants, a myriad of amenities and activities available on site.

www.serotoninclub.org/2023venue

We have a room block with discounted rates at the JW Marriott (\$179 per night). The link to make reservations in our hotel block with the JW Marriott will be provided upon registration. Note: rooms available at our group discount are limited. We strongly encourage you to make reservations early!

Special perks for staying at the JW Marriott:

- 16% VAT Exemption (copies of passport, immigration card obtained upon arrival to Mexico, and completed hotel registration card required)
- No Resort fees
- All rooms with private balcony or patio
- Group rate is extended 3 days prior and 3 days after meeting dates, depending upon hotel availability
- Complimentary parking
- Complimentary access to the Fitness Center

What's special about Cancun?

- Ranked #1 destination for US citizens outside the US and one of the main destinations for citizens from North and South America, Europe and Asia.

Left: View from a JW Marriott room balcony; Right: 5-HT molecule prepared by the pastry chef at the JW Marriott. Images courtesy of K. Cunningham.

- Best International airport in Mexico and Latin America
- Convenient flight connections (many direct) to major cities in the US, Europe, Central and South America
- Famous ecological parks and archeological zones throughout the peninsula
- Great Family Vacation Destination!

See you there,

The ISSR Executive Committee and
the Local Organising Committee

The International Society for Serotonin Research

Call for Young Investigator Travel Awards

2023 Meeting of the ISSR, Cancun, Mexico, April 23-27 "Serotonin on the Mexican Caribbean"

Applications from graduate students are invited for travel awards to attend the 2023 meeting of the ISSR. These awards will cover meeting registration and provide financial support to help defray some of the travel costs for young investigators to attend and participate in the 2023 meeting. The size of award will be contingent upon need (i.e., distance to travel) and is not intended to fully cover attendance. Applicants will be notified as soon as possible after the submission deadline of February 8, 2023, but no later than February 15, 2023.

Awardees will present their work as a poster and/or oral presentation and will be matched with a member of the ISSR who will serve as mentor and help with networking throughout the meeting. For any questions, please reach out to Dr. Noelle Anastasio (ncanasta@utmb.edu) or Dr. Lyn Daws (daws@uthscsa.edu).

Eligibility: Current graduate students may apply. Individuals already taking part in a programmed symposium are not eligible. Membership in the ISSR is not a requirement to apply, however, membership is strongly encouraged/desirable (instructions for how to join the ISSR may be found at <https://www.serotoninclub.org/join>).

The Application Packet includes 1) Abstract (one page, Arial font, size 11, inclusive of Title, Authors, Affiliations, abstract body and funding sources), 2) curriculum vitae, and 3) letter of support from the applicant's Mentor which also confirms graduate student status.

Selection of Travel Awardees will be based on:

- The quality of submitted abstract: The abstract must be of high scientific rigor and present novel, previously unpublished data.
- Curriculum vitae: The applicant's curriculum vitae must demonstrate a track record of scientific excellence and productivity, commensurate with the career stage of the applicant.
- Letter of support from the Mentor: This letter must document that the applicant is in good academic standing and comment on the applicant's potential for a career as an independent scientist.

Submit all applications using the following link: <https://form.jotform.com/230047189162050>

Women and minorities are encouraged to apply.

Deadline for submission February 8, 2023

Discover Cancun!

We contracted with Tropical Incentives, DMC to provide ground transportation from the airport to the Marriot Cancun Resort. Meeting attendees should arrange transport by booking with Tropical Incentives directly before arrival.

For more information visit:
<https://www.serotoninclub.org/2023transportation-tourism>

Cancun is the perfect location to mix work and play! We also contracted with Tropical Incentives to provide to our group tourism information and reservation assistance for various day excursions (preferably booked either before or after our meeting...) as well as evening entertainment. Full or half day trips can be booked in advance as well as on site during our meeting.

Services include airport pickup, transport to Marriott Cancun Resort, and Hospitality Desk at JW Marriott. Tropical Incentives will serve as a "private concierge" for our group and handle any tour and/or restaurant reservations (and more!). When you are ready to depart Cancun, they will arrange for your transport to the airport.

Tropical Incentives will maintain a hospitality desk in the JW Marriott exclusively for our group's convenience for booking excursions, restaurant reservations etc. Some activities available to be booked are shown below (please see the ISSR website for a full brochure of all available activities with pricing). You will be able to book activities up to three days before and three days after our meeting dates.

Leisure in Cancun

Snorkeling

XOXIMILCO

Sailing

CHICHEN ITZA

Deep sea Fishing

Golf

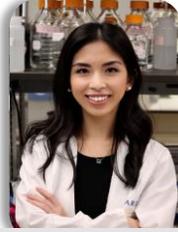

2023 ISSR Travel Awardees

We are delighted to (finally) announce our 2023 travel awardees! These individuals have ridden out the pandemic storm and patiently waited 3 long years to showcase their serotonin science in Cancun. As you might expect, in the course of 3 years some have progressed from student to post-doctoral fellow, and others from post-doctoral fellow to junior investigators. In this time, they have generated new and exciting serotonin research to share with us. We are all very excited to welcome our 2023 travel awardees in Cancun. Congratulations to all of our awardees!!!

Lindsay P. Cameron, PhD, Postdoctoral Scholar Malenka & Deisseroth labs, Stanford University, USA

Briana K. Chen, PhD, Postdoctoral Researcher Columbia University Irving Medical Center (CUIMC), USA

Thomas W. Flanagan, PhD, Staff Scientist Louisiana State University Health Sciences Center New Orleans, USA

Rocío Beatriz Foltran, PhD, Postdoctoral Fellow, IBCN - UBA/CONICET, Argentina

Supriya A. Gaitonde, Ph.D., Research Advisor, Institute for Research in Immunology and Cancer (IRIC), Université de Montréal, Montréal, Canada.

Joanna Gołębiowska, PhD candidate, Maj Institute of Pharmacology, Polish Academy of Sciences, Kraków, Poland

Felix P. Mayer, PhD., Postdoctoral Fellow, Department of Biomedical Science, Charles E. Schmidt College of Medicine, Florida Atlantic University, Jupiter, FL, USA

Christina Merritt, Ph.D., Director of Molecular and Translational Therapeutics, University of Texas Medical Branch, USA

Lluís Miquel-Rio, PhD candidate, Institute of Biomedical Research of Barcelona (IIBB), Spanish National Research Council (CSIC), Barcelona, Spain; August Pi i Sunyer Biomedical Research Institute (IDIBAPS), Barcelona, Spain; Mental Health Networking Biomedical Research Centre (CIBERSAM), ISCIII, Madrid, Spain

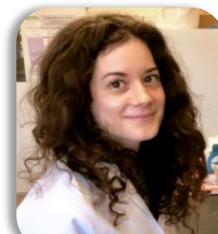

2023 ISSR Travel Awardees

Naku Nakatsuka, PhD, Senior Scientist
Laboratory of Biosensors and Bioelectronics, Institute for Biomedical Engineering, ETH Zürich, Switzerland

Marco Niello, PhD, Postdoctoral Research Associate, Genetics of Cognition Lab Istituto Italiano di Tecnologia, Via Morego 30, 16163, Genova, Italy

Rebecca "Becky" Ravenelle
Postdoctoral Scientist, Christine Denny Lab
Columbia University Irving Medical Center & New York State Psychiatric Institute

Justin M. Saunders, MD/PhD
Student
González-Maeso Laboratory - Department of Physiology and Biophysics - Virginia Commonwealth University, USA

Faranak Vahid-Ansari, PhD, Associate Neuroscience Researcher, University of Ottawa, Carleton University, Canada

ISSR Webinar

The ISSR delivered its first webinar this past September hosted by President Trevor Sharp and Vice-President John Neumaier. We had hundreds of serotoninologists join us for exciting talks from Susan Dymecki, Gitte Knudsen, Yulong Li, Christian Luscher, Bryan Roth and Harriet Schellekens. It was great to be "together" again and hear about current advancements in 5-HT research from leaders in the field. We hope to plan more webinars in the future. Stay tuned!

REMINDER

ISSR Serotonin is Back! Webinar

Recent Advances in Serotonin Research
September 13, 2022 at 7:50 am PDT/14:50 GMT

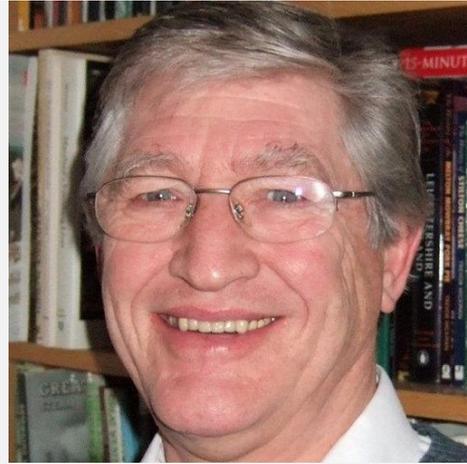

Speakers: Susan Dymecki, Gitte Knudsen, Yulong Li, Christian Lüscher, Bryan Roth, Harriet Schellekens

Fun at the ISSR 2022 Society for Neuroscience Mixer

Our annual ISSR mixer at SfN is back!! And oh, what fun it was! Vice President John Neumeier and Treasurer Lyn Daws hosted a wonderfully successful event at the Bay City Brewing Roof Top Bar in San Diego. Here, more than 60 serotoninologists were treated to good eats, drinks and abundant banter, in a beautiful roof top setting. Fire pits, sky lines and stars abounded. There was a great vibe surrounding the upcoming ISSR 2023 meeting in Cancun...added to by a wonderful slide show put together by John including tantalizing pictures of the venue, as well as a walk down memory lane from past ISSR mixers. We must give special thanks to **SAN DIEGO INSTRUMENTS** for sponsoring this event. Their continuing support of our society is essential for our ability to grow and to hold events such as these.

A. Richard Green, PhD, DSc 1944 – 2020

The Serotonin Club (currently International Society for Serotonin research) was created by Paul Vanhoutte in 1987 and has since been an essential component in 5-HT research, due to its successful and frequent meetings organised in association with IUPHAR, SFN, EPHAR and the BPS. Richard Green was a founding member, president and importantly for many years a highly efficient mentor/promoter of the Club [1], in addition to his multiple professional commitments with Astra Zeneca, the BPS, BAP and various journals. Under Richard's watch, the Club prospered and enabled multiple collaborations on preclinical and clinical aspects of 5-HT research between academia, biotech and big Pharma and taking a leading role in nomenclature. Our systematisation of 5-HT receptor nomenclature [2-6] paved the way for IUPHAR to set up multiple receptor and other nomenclature committees and forms the basis of the BJP Concise guide to Pharmacology in association with IUPHAR [7]. The multiple contributions of Richard to the 5-HT field are summarised in two events dedicated to 5-HT research in general and Richard Green in particular [8,9], where he highlights aspects of his preclinical and clinical work, and the importance of mentorship with clinical colleagues such as David Nutt, Guy Goodwin, Phil Cohen, Jeff Aronson and of course David Grahame-Smith.

Prof. Daniel Hoyer, University of Melbourne, Australia

See full tribute at www.serotoninclub.org/in-memoriam

Ewan J. Mylecharane, PhD

1944 – 2022

It is with great sadness that we share the news of the death of Ewan James Mylecharane, aged 77. Ewan was a distinguished pharmacologist who made a significant contribution to serotonin receptor pharmacology and to the service of our discipline.

Ewan began his career at the Victorian College of Pharmacy, Melbourne, with a Diploma in Pharmacy (1966) followed by a Bachelor of Pharmacy (1969) from the Victoria Institute College, Melbourne. He then gained his Bachelor of Science (1970) and PhD (1975) from The University of Melbourne. Ewan joined the Department of Pharmacology at The University of Sydney in 1978 as a Lecturer, rising to Associate Professor, and retiring after 27 years' service to pharmacology in 2005 when he became an Honorary Associate Professor. He was Head of the Department of Pharmacology 2002 - 2004. Ewan was a long-standing member of ASCEPT and served as an ASCEPT Council Member 1989 -1991.

Ewan's first research paper was published in 1970 with Colin Raper, in the British Journal of Pharmacology, on the prejunctional actions of beta-adrenoceptor antagonists in the vas deferens preparation of guinea pigs. He was a classic organ bath pharmacologist using a variety of vascular, cardiac and other smooth muscle tissues. His two most cited publications were major, multi-authored reviews. The first: "Proposals for the classification and nomenclature of functional receptors for 5-hydroxytryptamine", published in Neuropharmacology (1986) 25: 563 - 576 was cited 1281 times; the second: "International Union of Pharmacology classification of receptors for 5-hydroxytryptamine (serotonin)", published in Pharmacological Reviews (1994) 46: 157 - 203 was cited 3898 times (Google Scholar). Alongside these notable outputs, Ewan published numerous research papers in collaboration with many eminent pharmacologists including Danny Hoyer, Jim Angus, Pramod Saxena, Judy Black and others.

Prof. Daniel Hoyer, University of Melbourne, Australia

Mitsuhiro Yoshioka, PhD

1958 – 2021

It was a day of great personal sadness when we heard the news in November 2021 that Mitsuhiro Yoshioka had passed away. He had been a good colleague and friend to many of the members of the ISSR, but he will also be a big loss to all those who knew him.

Mitsuhiro was only 63 and died of colon cancer. He was a loyal supporter of the ISSR over many years and put in regular appearances at our meetings and SFN get-togethers. He hosted our 13th international conference of the Serotonin Club in Sapporo in 2007, and he was our Rest-of-the-World Councillor at the time of his death. Mitsuhiro was born in Sapporo on the island of Hokkaido in northern Japan on July 25, 1958. He studied medicine at Hokkaido University School of Medicine in Sapporo (1978-84) and remained there for the rest of his academic and clinical life. After his PhD (1989), and then a postdoctoral visit to the Department of Pharmacology, University of Michigan Medical School (1990, Charles Smith), Mitsuhiro was appointed Assistant Professor (1991) and then full Professor of Neuropharmacology (1998). He went on to become Vice-Dean (2015-17) and then Dean (2018-2020) of Hokkaido University School of Medicine. He studied peripheral and central mechanisms of serotonin throughout his research career and published over 90 papers on the subject. I first met Mitsuhiro in July 2006 at the Sapporo meeting. He and his colleagues assembled a fantastic scientific programme that brought together researchers from around the World to discuss their new discoveries in the serotonin field. In addition, as the host Mitsuhiro arranged a number of social events including an unforgettable dinner for the Council (including Mark Geyer, Sheryl Beck, Ewan Mylecharane, Charles Marsden) in downtown Sapporo at which we were introduced to fine Hokkaido food (including spider crab!). That first meeting with Mitsuhiro lead to 15 years of hugely enjoyable scientific and cultural exchanges between the two of us.

Prof. Trevor Sharp, Oxford University, UK

Call for nominations

- **VP-Europe**
- **Councilor-North America (1)**
- **Councilor-Rest of World (2)**

We are currently accepting nominations to serve in the position of Vice President-Europe as well as Councilor for North America (one open) and Councilor for Rest of World (two open). The Vice President-Europe and Councilors serve 4-year terms and are elected by the membership of the region they will represent. Typically, Councilors are mid-career/senior investigators.

If nominating someone, please provide confirmation that the member is willing to serve. Self-nominations are welcome. The nominee must be a current member of the ISSR.

Nominations may be sent to Dr. Noelle Anastasio (ncanasta@utmb.edu).
Deadline for nominations is March 1, 2023.

ISSR Membership Information

Membership dues were previously waived for the 2021-2022 cycle for members who either renewed their membership or joined the society during the 2019-2020 dues cycle. We welcome members who did not renew membership during the last cycle to do so now, with no penalty. Please note that discounted biennial meeting registration fees, which are significant for current members, will apply only to those who are up to date in dues payments. Your dues payments provide the support needed to maintain viability of the ISSR. Thank you for your support!!

Benefits of ISSR Membership:

- Networking opportunities to form collaborations with other serotonin researchers
- Opportunities for professional development and leadership in the Society
- Opportunities to submit proposals and chair symposium at our international biennial meetings
- Discounted registration feeds to attend our international biennial meetings
- Information about and invitations to ISSR-sponsored events, e.g., FENS socials, SfN mixers
- Delivery of our Society newsletters directly to your email

Membership Categories:

- Regular (faculty or equivalent) \$100 USD
 - Trainee (student or postdoc) \$60 USD
- We require email confirmation of student or post-doc status.*
- Retired (former member) \$60 USD
 - All costs are for a 2-year membership

Payment can be made at our ISSR website (<https://www.serotoninclub.org/join>).

In some cases, we are able to accept bank wire Transfers for dues, please contact Lyn Daws (daws@uthscsa.edu) to make arrangements. Alternatively, you may send a check or money order payable to the "International Society for Serotonin Research" to Lyn at the address below.
